Informatik-Kolloquium

Rheinisch-Westfälische Technische Hochschule Aachen
Lehrstuhl für Informatik III

RWTH

EINLADUNG

Zeit: Donnerstag, 18. November 1999, 17.00 Uhr

Ort: AH I, Ahornstr. 55 (ehem. PH)

Referent: Prof. Dr. Carlo Ghezzi,
Politecnico di Milano

Thema: Software Process Research: A Journey Report

Abstract:

The talk will be a journey through the main software process research efforts carried out during the past decades. It will emphasize the achievements, the lessons learned by failures, and the results on which future work may be built. I will contrast two main approaches:one based on detailed modeling of the process, prescriptive support, and support to complete automation versus another based on looser support, emphasis on distributed cooperation of workgroups, and flexible evolution.

The journey will use as working examples three process support environments developed by the software engineering group at Politecnico di Milano: SPADE, SENTINEL, and PROSYT.

Es laden ein: Die Dozenten der Informatik
